Digitalization in Hospitals:
Experiences with Implementations

Organizer
Navin Sewberath Misser, Researcher
HU University of Applied Sciences Utrecht, The Netherlands

Panelists
Doug Vogel, Professor
Harbin Institute of Technology, Harbin, P. R. of China
Johan Versendaal, Professor
HU University of Applied Sciences and Open University, The Netherlands
Juergen Seitz, Professor
DHBW Heidenheim, Germany
Nilmini Wickramasinghe, Professor
Epworth Healthcare & Swinburne University of Technology, Melbourne, Australia
Ronald Spanjers,
Roessingh Rehabilitation, Enschede, The Netherlands
Živa Rant, Expert Associate
National Institute of Public Health, Slovenia

Panel Outline
Many hospitals in Europe have been developing and implementing new technological devices and information systems. In this panel discussion, we will be sharing experiences of digitization projects in hospitals and focusing on effects of digitization projects on hospital professionals and/or patients. We will be discussing (successes and failures) of implementations of information systems in hospitals, with the purpose to identify influencing factors for successful implementations.
