During their study, many students obtain a wider insight into the applicable knowledge and participate in finding new solutions to modern challenges from domestic and foreign environment. This year's international case study competition is an opportunity, where different groups of students from domestic as well as foreign faculties come to compete face to face.

The concept of case study is a methodological and pedagogic-oriented challenge, aimed at integration of different theoretical concepts and situations from the real business environment. For this reason alone the case study methodology allows participants, to work out a detailed insight into the practical business-oriented problem of the studied organization or company. Through diverse discussions as a method of active learning we encourage the adoption and development of critical and creative thinking that is necessary in the field of management.

The Signing of a Letter of Cooperation between University of Maribor, Faculty of Organizational Sciences and NATO Mountain Warfare Centre of Excellence

V Republiki Sloveniji, ki je od leta 2004 članica Severnoatlantskega zavezništva, je obvladovaje gorskega prostora eden od temeljev vojaške varnosti. Med osnovne dejavnosti Slovenske vojske od njenega nastanka dalje spada tudi usposabljanje in razvoj večin gorskega bojevanja. Da bi učinkovito povezali interese zvezze NATO z interesami RS in državami članicami, sta Ministrstvo za obrambo RS in Generalštab Slovenske vojske ustanovala prvo mednarodno vojaško organizacijo na ozemlju RS, Natov center odličnosti za gorsko bojevanje (NATO COGB). Skupni interes NATO COGB in Fakultete za organizacijske vede Univerze v Mariboru je združitev ekspertnega znanja, pridobljenega z raziskovalnim in pedagoškim delom, na osnovi katerega lahko obe organizaciji ponudita zvezi NATO in RS različne skupne vsebine. Obe instituciji sta prepričani, da s skupnim delovanjem lahko dosežeta odlične sinergijske učinke na mnogih področjih ter tako gradita odličnost ter ugled v regiji in širši skupnosti.

Slovenia, a country for which the management of alpine area is one of the cornerstones of military security, has been a member of the North Atlantic Alliance since 2004. In addition, since its formation, training and development of mountain warfare skills has been one of the basic activities of Slovenian Armed Forces. In order to effectively link the interests of NATO, its member states, and the Republic of Slovenia (RS), the Ministry of Defence and General Staff of the Slovenian Armed Forces established the first international military organization on the territory of the RS, NATO Mountain Warfare Centre of Excellence (NATO MW COE). NATO MW COE and the Faculty of Organizational Sciences, University of Maribor have a common interest to merge expert knowledge gained through research and teaching, and to offer a variety of common content to NATO and the RS. Both institutions believe that great synergies could be achieved based on joint activities, resulting in recognized excellence and reputation in the entire region as well as wider community.

Model odličnega vodenja (EFQM) je orodje, ki pomaga organizacijam se stalno izboljševati na vseh področjih delovanja in dvigovati svojo konkurenčnost na osnovi izvajanja samoocene in »benchmarkinga«. To orodje so kot del načina vodenja in delovanja prevzele številne odlične slovenske organizacije, ki bodo preko predstavitev svojih dobrih praks, pokazale, kako so se z uporabo modela samoocenjevale, rastle in izboljšale svoje rezultate delovanja. Predstavitvam bo sledila okrogla miza, na kateri bomo z managerji odličnih organizacij nadaljevali pogovor, kaj je potrebno za uspešnost organizacij, katera so temeljna načela vodenja in kako v organizaciji spodbujati ustvarjalnost ter inovativnost.

The Excellence Model (EFQM) is a tool that helps organizations to continuously improve in all areas of activity and to raise its competitiveness on the basis of the implementation of self-assessment and »benchmarking«. This tool as part of the method of management and operation undertook a number of excellent Slovenian organization, which will be through the presentation of its good practices , shown when using the model to

self-assess , grow and improve its results of operations. The presentations will be followed by a round table at which we will host excellent managers. We will continued discussion what is necessary for the performance of organizations, which are the fundamental principles of governance and how the organization to promote creativity and innovation.

Delavnica / Workshop: Kako strukturiramo in napišemo raziskovalni članek / How to Structure and Write a Research Paper /ENG/

Dvorana / Hall: VASCO DA GAMA
10.30 – 12.00

Vodi / Chair: Jože Zupančič

Cilj te delavnice je podati celovit pregled nad tem, kako oblikujemo in napišemo članek, ki predstavi rezultate raziskovalnega dela na način, ki je splošno sprejet v okolju raziskovalcev. Predstavili bomo razliko med strokovnimi in raziskovalnimi članki. Nato bomo obravnavali strukturo, slog in predstavitev raziskovalnega poročila. Delavnica se osredotoča na najbolj pogoste napake, pomanjkljivosti in opustitve, kakršne pogosto najdemo zlasti v člankih, ki jih napišejo mlajši in manj izkušeni raziskovalci. Prispevek se zaključi s priporočili avtorjem raziskovalnih člankov, kako bi se lahko izognili tem pomanjkljivostim pri načrtovanju in pisanku članka.

The goal of this workshop is to provide a comprehensive overview of how to structure and shape a paper, which presents the results of a research effort in a way commonly accepted in the research community. After presenting the distinction between research and professional articles, the paper deals with the structure, style and presentation of a research report. It focuses on most common flaws, shortcomings and omissions frequently found in particular in papers written by junior researchers. The paper concludes with recommendations to authors how to avoid such weaknesses when planning and writing a paper.
